GUNNEBO[®]

Technical Specifications

Physical Dimensions

Primary Functions

- Sensor-activated and touch free.
- Hygienically delivers sanitiser gels and disinfectant.
- Eliminates cross-contamination and increases compliance.
- Ready-to-use cartridge shortens refill time.
- Capacity of 1.2L.
- Simple installation.
- Tamper proof lock and key.

Specifications

Colour	White
Power Source	4 x C-cell Batteries (included)
Dimensions	152mm (W) x 100mm (D) x 290mm (H)
Installation	Pole-mounted on stainless steel pedestal with glass barrier
Materials	Polypropylene, ABS
Capacity	1.2 Litre
Consumables	Gel / Liquid / Foam

H-Sense Infection Control Features

H-Sense is a family of access control solutions specifically designed to provide contactless and automated infection prevention and control functionalities, providing your building and its occupants with protection from the point of entry.

H-Sense G - Sanitiser Gel Dispenser

H-Sense G features an automatic sanitiser gel dispenser linked to the turnstile functions of the gate, with mounting pole and glass barrier, that will administer a dose of hand sanitiser contactlessly and will not allow entry unless sanitiser has been administered.

It is well documented that practising good hand hygiene is a critical factor in preventing the spread of infection, by minimising the opportunity for infectious agents and pathogens to be deposited on hard surfaces like doors and windows, particularly in communal areas.
