

Gunnebo OccuSign Digital Signage

Digital signage for customer guidance and direction, connect with OccuLinq app to implement social distancing and occupancy management of retail stores

OccuSign Digital Signage

OccuSign is a POS digital signage solution, designed to enable social distancing and occupancy management of your retail premises. Protect your customers wellbeing with real-time visual feedback on safe available capacity at your store entrance or specific zones within it.

Ideally combined with access control gates and the **OccuSense** people counting camera, OccuSign then provides a complete solution to ensure safe social distancing by managing occupancy levels within your store.

OccuLinq People Counter App

Gunnebo's **OccuLinq** app provides complete occupancy management and monitoring with full visibility of your store's customer count in real-time. Available for all mobile devices supporting iOS and Android operating systems.

Designed for seamless integration with other solutions in the **OccuSense** product family, the app can be used to communicate with cameras, digital signage displays or access control functions within entrance gates.

OccuSign L

Large Format 43" 4K UHD Display

OccuSign L is a large format 43" 4K UHD display, ideal for overhead or wall-mounting to provide customers with clear direction and guidance at a distance.

Features

- 43" 4K UHD digital signage display supporting 24/7 operation, 500 nit brightness and intelligent upscaling.
- Slim and symmetrical design for simplified wall mounting and seamless installation.
- Clean cable management presents a neat and tidy appearance to customers.
- Wi-Fi and Bluetooth connectivity built-in.
- Industry standard certified, with EMC Class B compliance and EPEAT registration.
